

Tokenomics

Token Name: Cyborg Token (**BORG**)
Total Supply: 20 Million BORG
Deployment Network: Cyborg Network
(A Polkadot Parachain)

Token Utility

Service Payments:

Cyborg Titans and Node operators will receive BORG tokens for supporting the network and maintaining uptime guarantees.

Renting AI Compute Power:

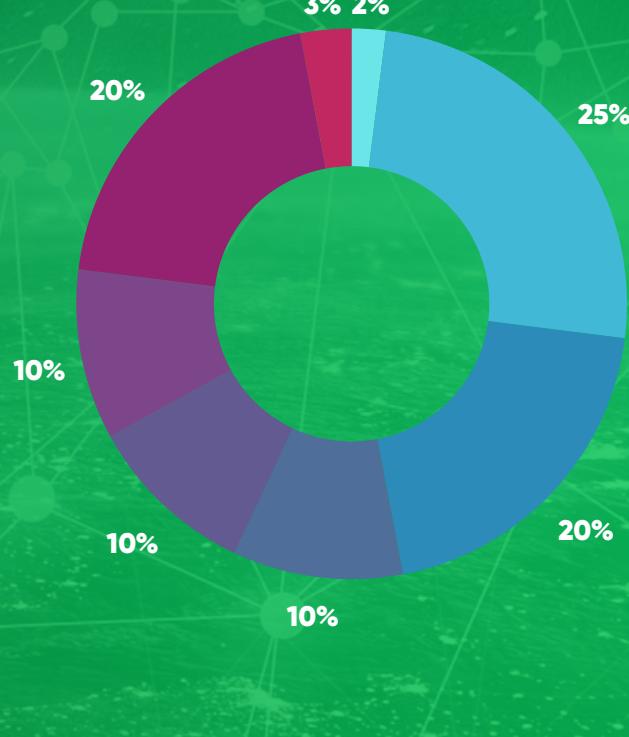

BORG tokens can be used to rent compute hours at discounted rates for executing AI tasks on Cyborg Miners.

Collateral Staking:

Cyborg Titans stake BORG tokens to ensure miner uptime. Failures will result in slashing, maintaining network trust and reliability.

Token Distribution

- Early Contributors:** Allocated to early technical contributors, with individual amounts based on impact scores determined before TGE.
- Exchange Listing/Public Sale:** Dedicated to CEX/DEX listings to manage supply and promote decentralization.
- Miner Uptime Rewards:** A locked reserve fund exclusively used to reward Cyborg miner operators for uptime. No external access.
- Foundation Reserve:** Reserved for protocol, operations, and ecosystem, managed by the Cyborg Foundation.
- Founding Team:** Equally allocated among all of the founders of the project.
- Marketing and Community:** Allocated for growth initiatives, including airdrops, community events, and ecosystem expansion.
- Early Backers:** Allocated to initial investors who funded early development of the protocol.
- Presale:** A dedicated supply for a public presale event before the launch.

Vesting Schedule

Genesis Distribution: Fully unlocked 45 days post-Token Generation Event (TGE).	Early Contributors: 2-year cliff, followed by a 20% unlock; the remaining 80% unlocks monthly over two years.
Marketing and Community Initiatives: 30% unlocks at TGE; the remaining 70% unlocks monthly over three years.	Founding Team: 1-year cliff, followed by a 40% unlock; the remaining 60% unlocks monthly over two years.
Foundation Reserve: 30% unlocks at TGE; the remaining 70% unlocks monthly over three years.	Early Backers: 6 month cliff, followed by a 10% unlock, the remaining 90% unlocks monthly over two years.

Inflation Model

To ensure long-term network sustainability and incentivize participation, an annual inflation rate of 3% is proposed, primarily to reward collators and support network security.

Cyborg Network powers the future of AI with secure, decentralized, and scalable computing infrastructure.
